

70 Years of Nuclear Weapons— At What Cost?

On the morning of August 6, 1945, the “Enola Gay,” a U.S. B-29 bomber, dropped an atomic bomb on the city of Hiroshima.

Three days later, a second American nuclear bomb incinerated Nagasaki.

**On August 6, 2015, at 8 AM
Come to Livermore Nuclear Weapons Lab
Vasco Road at Patterson Pass Road**

Program featuring Daniel Ellsberg, Country Joe McDonald, Taiko drummers and more; followed by a short march to the Lab gate, a traditional Japanese Bon Dance, nonviolent direct action and witness.

Today, after 70 years, nearly 16,000 nuclear weapons—94% of them held by the USA and Russia—continue to pose **an intolerable threat to humanity**, and the danger of nuclear war is growing. Whether a nuclear exchange is initiated by accident, miscalculation or madness, the radiation will know no boundaries. The USA plans to spend **a trillion dollars over the next thirty years** “modernizing” **its nuclear arsenal**. **The human cost of this is immeasurable**—to our health, environment, ethics, and democracy, to our prospects for global peace, and to our confidence in **human survival**.
